BODY PLASTIC SURGERY

KATE HUDSON

"Hudson's tip was very boxy, lacking any definition," explains plastic surgeon **Dr. Steve Faliek**. "Now, her nose is much more refined — improved."

Are they real?

Most don't admit it (and the change is subtle) but tons of stars fix their noses

The nose is the most visible part of the face and if there's an imperfection, there's no hiding from it. Small wonder rhinoplasty is one of the most common forms of plastic surgery. How

common? In 2004 alone, over 166,000 people in the U.S. had rhinoplasty. But more importantly, the stars are getting them. Here, plastic surgeon **Dr. Steve Fallek** speculates on who has had what done.

2004

BRITNEY SPEARS

"I had the biggest nose," Britney said of a photo of herself from the eighth grade. "It's definitely more narrow, and the tip has been shaped," notes **Dr. Fallek**

THEN

2005

JAMIE-LYNN DISCALA

DiScala's nose is "definitely improved, but the tip may be too elevated," says **Dr. Fallek**

CAN A NOSE JOB BE BAD?

JENNIFER GREY

THEN

1987

"It's much smaller and better, but it changed her look entirely," says **Fallek**. Maybe that's why Grey had more trouble getting work after the surgery than before

2005

HALLE BERRY

"It's a very subtle difference, so Halle may have had tip work performed, but it's hard to say," explains **Dr. Fallek**
